

FEATURED SERVICES

DIAMOND CUT 6-SIDE Pre-Squared Blocks

- ♦ All surfaces finished .015 to .020 over the dimensions on the bill of materials.

SPECIAL Pre-Squared Blocks

- ♦ Blocks will be pre-squared to customer's required tolerances.

STANDARD 6-SIDE Pre-Squared Blocks

- ♦ Edges and ends squared to .015 to .020 over the dimensions on the bill of materials.
- ♦ Thickness will be standard plate tolerances of .015 to .035 oversize.
- ♦ Non-standard thickness can be machined at customer's request.

On January 1, 1995, Diamond Metals opened its doors for business. It was our objective to sell the highest quality material at competitive prices with short lead times. We also identified a developing interest with customers in buying pre-squared blocks. Diamond Metals decided to make this its signature product line. We introduced the "Diamond Cut" six side pre-squared blocks. Our company also instituted an advanced software system which allows us to perform quotes on standard items within minutes.

In July of 2026, Diamond joined the BICO Steel family of companies. Giving us access to a broader material base and expansive inventory. As well as industry knowledge developed since their inception in 1896.

Our skilled employees, equipment and broad product line have provided us the ability to supply a national customer base. It is our goal at Diamond Metals to work towards becoming our customers' most valued supplier.

We appreciate the opportunity to quote on your material requirements and we hope we can be of service on your next order.

Thank you for your past and future support.
